EXAMPLES OF COMMON LOAD SIZES

These are approximate examples to help visualize common loads.

1 CUBIC YARD
\$20

2 CUBIC YARDS
\$40

3 CUBIC YARDS
\$60

4 CUBIC YARDS
\$80

5 CUBIC YARDS
\$100

6 CUBIC YARDS
\$120

HOW WE ESTIMATE YOUR LOAD

1 VISUAL ESTIMATION

Our team will visually estimate the amount of space your material occupies.

2 OR CALCULATE IT

You can estimate cubic yards using:

Length x Width x Average Height

27

= Approximate Cubic Yards

3 APPLY THE RATE

Multiply the estimated cubic yards by \$20.

Pricing is based on the amount of material, not the size of the truck or trailer.

- Loads containing certain materials may be subject to different pricing or additional fees.
- Final load volume and disposal charges are determined by facility staff.
- Examples above are for general reference and may vary based on the type and shape of material.
